PROFESSIONAL SUMMARY

Applied AI Software Engineer with 3+ years experience building scalable, user-focused full-stack web/mobile applications. Driven to collaborate with curious, detail-oriented, and motivated people to deliver meaningful value.

EMPLOYMENT HISTORY

APPLIED AI SOFTWARE ENGINEER Oct 2024 - Present
InventoryQuant LLC (Y Combinator W26) - Remote

- Owned development from concept to launch for SaaS insurance claims automation platform (React, Next.js, TypeScript, PostgreSQL)
- Designed and deployed LLM-powered transcription, classification, and pricing pipelines, achieving 99% accuracy on 1-hour audio claims, automating processing of 1,000+ line items per claim
- Fine-tuned OpenAI models using synthetic training data and evaluation pipelines to handle complex user input and continuously improve transcription and pricing accuracy
- Onboarded first client, processing 100k+ line items, reducing average claim turnaround from 4 days to 4 hours

LEAD SOFTWARE ENGINEER Sep 2024 - Dec 2024
LastCall - Remote

- Led rapid development of text blast management system, enabling bars to launch targeted marketing campaigns in days instead of weeks
- Engineered robust user engagement dashboard with Firebase, JavaScript, and Python, delivering key performance metrics to clients
- Orchestrated seamless migration from limited online tool to React web app, scaling the platform for client growth

SOFTWARE ENGINEER Oct 2023 - Mar 2024
National Hillel Basketball Tournament - College Park, Maryland

- Launched iOS Flutter app, engaging 1,000+ players/fans, handling 4 million+ Firebase read/write operations
- Orchestrated full-stack logic integration to align with tournament requirements, enhancing fan engagement through real-time updates, player/team info, and statistics
- Built React web-app for scorekeeping and event management, replacing manual workflows for tournament staff

SOFTWARE ENGINEER INTERN Jun 2023 - Aug 2023
Major League Baseball - New York, New York

- Redesigned internal React/JavaScript app to clear cached data, ensuring accurate statistics across MLB.com
- Implemented file validation and upload workflows, improving data quality and accelerating submission processes
- Adopted agile development practices and delivered a live demo to 100+ staff, leading to product adoption

DATA ANALYTICS INTERN May 2022 - Jul 2022
Hapoel Jerusalem Soccer Team - Jerusalem, Israel

- Developed Python script to visualize XML game data, supporting coaching staff in game planning and scouting decisions
- Presented findings to diverse audiences, bridging technical and strategic perspectives

EDUCATION

Master of Science in Emerging Technologies: Machine Learning & Artificial Intelligence Expected May 2027
New York University - New York, New York; GPA: 3.83

LeetCode BootCamp, New York University Tandon Career Hub Feb 2025 - Apr 2025

Bachelor of Science in Computer Science; Data Science; Minor: Global Engineering Leadership May 2024
University of Maryland - College Park, Maryland

SKILLS

TypeScript, JavaScript, Python, React, Next.js, Node.js, NestJS, AWS, Terraform, Docker, PostgreSQL, REST APIs, LLM applications

ADDITIONAL INFORMATION

LEADERSHIP
President, Multicultural A Cappella - College Park, Maryland DEC 2022 - DEC 2023
